

**Welcome to Volume 14 of the LINEV Systems UK Newsletter – our first edition of 2026.**

It's been a very exciting start to 2026 for LINEV Systems UK so we're delighted to share updates on multiple upcoming events, award nominations, important memberships, trials, case studies and more.

As always, if you have any questions about the content or would like more information about any of our products or services, feel free to get in touch, you'll find our contact details on the final page. If you're on LinkedIn, don't forget to follow our page for more regular updates!

## AWARD SHORTLIST – OSPA'S

### OSPA FINALIST 2026

LINEV Systems UK is proud to announce that following on from an award win at Milipol 2025 in Paris late last year we have now been shortlisted for the 'Outstanding New Security Product' award at the 2026 Outstanding Security Performance Awards (OSPAs) for the innovative LV STREAM High Footfall Bag Scanner. This recognition highlights our continued commitment to advancing security screening technology that meets the demands of busy, high-throughput environments without compromising accuracy or user experience. In addition to the shortlist success, LLINEV Systems UK is delighted to be sponsoring an award category at the 2026 OSPAs and looks forward to celebrating excellence across the security sector at the awards dinner, alongside industry peers and partners.

## UPCOMING EVENTS

It will be a busy few months for the team as we are exhibiting at multiple events:-

- UKCMA 'Safer Crowds Safer Venues' – Middlesborough 3<sup>rd</sup> & 4<sup>th</sup> March
- Carlisle Support Services Innovation Lab – Liverpool 5<sup>th</sup> March
- Security & Policing 10<sup>th</sup>-12<sup>th</sup> March – Farnborough
- BSIA Spring Forum – 17<sup>th</sup> March – Milton Keynes
- TSE (The Security Event) – 28<sup>th</sup>-30<sup>th</sup> April – Birmingham

### Want to arrange a meeting?

Email us on [ukinfo@linevsystems.com](mailto:ukinfo@linevsystems.com)

We look forward to meeting you there.

## SECURITY INSTITUTE & MADE IN BRITAIN MEMBERSHIPS

LINEV Systems UK has recently completed two important industry memberships – Made in Britain and The Security Institute. Joining Made in Britain reflects our strong commitment to promoting British manufacturing. The Security Institute enables us to actively support the UK security sector.

Both these memberships underline how important it is to us to champion quality, innovation, and integrity, while also being part of wider professional communities that share knowledge, raises standards, and helps others to develop and succeed.

## BATTERY CASE STUDY

Batteray® is the world's FIRST AI automated battery sorter, and Børstad AS in Norway recently implemented LINEV Systems' battery sorting system to overcome the growing challenges of manual battery sorting, which had become time-consuming, costly, and unable to meet rising quality demands. Following a smooth deployment completed in under a month, Batteray® immediately improved sorting accuracy by reliably identifying mislabelled batteries, giving Børstad a clear competitive edge while saving valuable time. Backed by LINEV Systems' expertise and ongoing support, the solution has already delivered measurable efficiency gains and is now a key part of Børstad's long-term sustainability and quality strategy.

### THE IMPLEMENTATION OF BATTERY® BATTERY SORTING SYSTEM

#### SELECTION PROCESS

The decision to implement Batteray® was driven by the system's innovative X-ray technology. After evaluating several options, Børstad chose LINEV Systems® due to its extensive expertise in X-ray solutions and the unique capabilities of Batteray®.

##### Key Decision Factors

- X-ray Technology: Batteray's® advanced X-ray technology was pivotal in the decision-making process.
- Reputation: LINEV Systems® experience and reputation for delivering reliable and cutting-edge solutions made them a trusted partner.

#### IMPLEMENTATION

The deployment of Batteray® was seamless and efficient. From order to delivery, the process was completed in less than a month. The implementation team at LINEV Systems® worked closely with Børstad's operators, ensuring that they were fully trained and confident in using the new system.

## LV STREAM HIGH FOOTFALL SCANNER – UPDATE

In recent months, the LV STREAM High Footfall Bag Scanner has continued to be successfully installed at several iconic sites across the UK, with consistently positive feedback from all locations involved. "Visitor experience was a key area where LV STREAM performed strongly. Feedback from both visitors and front-of-house colleagues indicated that the screening process felt noticeably less intrusive than traditional screening methods, it contributed to a calmer, more welcoming arrival experience, which is particularly important in a setting such as ours."

To see the system in action please contact us for a demo or join us at one of the many events we are exhibiting at soon (see above).
