

LV STREAM

High Throughput Threat Detection X-ray Scanner

NEXT-GENERATION
SECURITY SCREENING

LV STREAM is a cutting-edge bag inspection system combining advanced AI-powered software with state-of-the-art hardware to deliver unparalleled efficiency and accuracy.

Capable of processing 1500+ bags per hour the system ensures high throughput without compromising security.

The AI algorithms precisely detect and sort suspected bags automatically, providing comprehensive threat detection for various types of weapons, as well as suspicious high mass objects (potential IEDs), and other prohibited items.

Designed for easy installation and mobility, this system adapts seamlessly to high-traffic venues, stadiums, buildings, schools, museums and other public spaces.

This system is designed to be easy to use and cost effective to operate. No extensive training or time-consuming image analysis is required, allowing operators to start using the system immediately.

APPLICATIONS

Schools & Universities

Stadiums & Concerts

Museums & Cultural
Venues

Government & Critical
Infrastructure

Why LV Stream?

Technology that Changes the Game

S	SMART SCANNING Places the burden of analysis on the equipment, not the operator
T	TRUSTED RESULTS Superior detection with low false alarms
R	RELIABLE OPERATIONS Robust design that is easy to operate
E	EVOLVING DETECTION LIBRARY Potential IED's, Guns, Ammo, Grenades, Knives, Pepper Sprays
A	ARTIFICIAL INTELLIGENCE Sophisticated AI-powered algorithms
M	MODIFIED AESTHETICS Available in a variety of colors and graphics

Innovation in action

LV Stream transforms screening into an intelligent process.
